KRAHN

Your high-performance partner for specialty chemicals.

We are a leading independent chemical business providing sales, marketing and distribution services and are recognized world-wide for our technical expertise and high-quality product portfolio as well as in-house laboratory support. Everything we do is with passion and commitment and always with an eye on the best possible outcome.

Thinking global and acting local

KRAHN Subsidiaries

- Hamburg
- Zaandam
- Milan and Berbenno
- Poznań
- Avon
- Athens
- Gothenburg
- Sandbach
- Aspe
- Vienna

Sales offices

- České Budějovice
- Tiszaújváros
- Sibiu

Laboratories

- Bottrop
- Poznań
- Gothenburg
- Lainate and Berbenno

Warehouses

Many warehouses across Europe, also with possibilities for bulk breaking

Additives

Product Group	Product Name	Producer	Product Description
Accelerator	CRANE® CN-11004	KRAHN Chemie	Replacement for Calcium Formate.
	CRANE® CN-11004	KRAHN Chemie	Replacement for Lithium Carbonate.
Rheology modifiers	Bermocoll®	Nouryon	Versatile additive for Building and Construction applications. Provides consistency, stability, workability, water retention and adhesion to dry mix mortars and ready-to-use dispersions. Used for tile adhesives, joint fillers, plasters, renders and skim coats, ETICS mortars, self leveling flooring, grouts.
	Laviokoll	Laviosa	Range of rheological additive suitable for construction systems.
Speciality additives	CRANE® CN-10008	KRAHN Chemie	CSA cement can be used as a binder or as an expanding agent offering anti-cracking properties.
	CRANE® CN-15004	KRAHN Chemie	Metakaolin is a calcined product of the clay mineral Kaolinite. It is the most efficient pozzolanic material available. It is added to mortars and concrete to avoid efflorescence and to improve mechanical properties.
	CRANE® CN-16001-16005	KRAHN Chemie	Fly ash classifies to very fine particle sizes (10). The fineness of the spherical particle guarantees a higher pozzolanic reactivity and improves the rheology of mortars and concrete.
	Lapisil 365	KRAHN Chemie	Very fine pozzolanic material. Adding it to concrete and other materials, increases their density and wear resistance, which extends the life of structures.

Binders

Product Group	Product Name	Producer	Product Description
Bio-based acrylics	Synexil Bio	Synthos	Bio-based dispersions combine high quality and real content of bio raw materials according to ASTM D6866.
Impregnating agent	Aldepol H35 Aldepol HS30 Aldepol H35 Zero	Imparat	The excellent penetration capability makes Aldepol H35 and HS30 especially suitable for primers without plasticizers and solvents. The primers are in use at absorbent surfaces such as gypsum, asbestos cement, plaster, concrete as well as sandy mineral surfaces. Now available in a biocide-free option.
Pure acrylics	Osakryl Synexil	Synthos	The Synexil and Osakryl brands cover a wide range of dispersions based on acrylics. The dispersions meet the market needs for formulation of products in the construction chemistry such as plasters, putties, paints, primers, wood coatings and dispersion adhesives such as wood, paper, pressure sensitive adhesives.
Styrene acrylics	Osakryl Synexil	Synthos	The Synexil and Osakryl brands cover a wide range of dispersions based on styrene-acrylics. The dispersions meet the market needs for formulation of products in the construction chemistry such as plasters, putties, paints, primers, wood coatings and dispersion adhesives such as wood, paper, pressure sensitive adhesives.

Fillers

Product Group	Product Name	Producer	Product Description
Lightweight fillers	Aeropor®	Aeropor GmbH	Aeropor is an expanded aluminosilicate from natural origin. It is a closed-pored light weight aggregate. Aeropor is used for many building and construction applications thanks to its unique combination of beneficial properties: low density and pressure stable, health friendly material, odorless and no VOCs, excellent thermal insulating properties, excellent sound absorption properties, insensitive to heat and cold and creamy white color.
	Expancel	Nouryon	Expancel expandable microspheres are small spheres encapsulating a gas. When heated, they will dramatically increase in volume. Expancel is available unexpanded and expanded both wet and dry. It can be used as a blowing agent, weight reducer and property improver in many different applications. The expansion capacity and low density along with a closed cell structure and excellent compressibility give benefits to numerous other products.

Pigments

Product Group	Product Name	Producer	Product Description
Iron oxide pigments	Iron Oxide	Toda United Pigment	Full colour range of iron oxide pigments with excellent colour consistency, very good dispersibility and high tinting strength.
